The SOUND
• Sound units are compatible with both DCC and DC operations.
• Program an m/u lashup with lead unit only horn, bell and lights.
• Six-button remote control allows control in the DC mode of the horn, bell, coupler crash, break squeal, dynamic brake and brake air release.
• Additional DC mode programmable features allow for different bell and horn tones, coupler on/off, bell rate, directional lights on/off and volume control.
• Full DCC functions when in DCC mode.

The LOCOMOTIVE
• Fully assembled and ready to operate
• Installed scale profile Celcon handrails
• Directional Micro-Bulb head lights
• Highly detailed fuel tanks
• Dynamically balanced skew wound armature and flywheels for smooth performance
• Combines injection molded, die-cast, lost wax casting and photo-etched parts for the most detailed model available
• State-Of-The-Art tooling
• Cab interior
• See through fans
• Detail variations to match the prototype

These are the last three of a total of five Bicentennial units that we will produce. If you want ATSF Bicentennial units, we urge you to reserve these and get them while they are available! We may make these in the future, but it won't be soon, that's for sure.
